

# Introducing SB Foods: Simplicity, Anytime, Anywhere

SB Foods is a digital platform that is transforming the way people order food online. With its user-friendly interface and efficient ordering process, SB Foods makes it easy to discover and enjoy delicious meals anytime, anywhere.

# Transforming Online Food Ordering with Ease and Efficiency

Online food delivery service:

## 6 planning steps

### 1. Get the right POS system

Consider a system that has delivery options, online ordering and the ability to capture customer data.

### 2. Tweak your kitchen line

The kitchen line will need to be capable of dealing with high order volumes and prioritising them.

### 3. Choose your ordering service

You could opt to take, process and deliver the food yourself, but there's a reason the likes of UberEATS exist.

### 4. Decide food transportation

You'll need to tackle thorny issues like whether or not employees can use their own cars or company cars.

### 5. Consider branded packaging

Deliveroo, may brand deliveries with their livery, but you might have the opportunity to use your own.

### 6. Create a separate delivery menu

Don't feel like you have to offer the exact same in-house menu for delivery customers.
